

Janeesha Vishwaprabha

Undergraduate in Computer Science

+94 77 959 3243 | janeeshagamage02@gmail.com | janeeshagamage.me | LinkedIn | GitHub

Udagama, Embilipitiya, Sri Lanka

Objective

Computer Science undergraduate with strong foundations in distributed systems, software engineering, and backend development, seeking an AI/ML internship to apply and expand skills in machine learning, intelligent system design, and data-driven application development. Eager to contribute to real-world AI pipelines and research-oriented engineering challenges.

Education

BSc (Hons) in Computer Science

2024 – Present

Sri Lanka Institute of Information Technology (SLIIT)

Sri Lanka

- Relevant coursework: Distributed Systems, Compiler Design, Software Engineering, Database Management, and Algorithms & Data Structures.
- Batch Representative; Vice President, Computer Science Student Community.

Secondary Education

2013 – 2022

President's College, Embilipitiya

Sri Lanka

Technical Skills

AI / ML	Python (NumPy, Pandas), FastAPI-based model serving, data pipeline design, logical clock algorithms, probabilistic reasoning
Languages	Python, Java, C#, JavaScript, TypeScript, C, C++
Backend & APIs	ASP.NET Core, Spring Boot, FastAPI, Node.js, RESTful APIs
Frontend	React, TypeScript, Tailwind CSS, GSAP, Vite
Databases	MySQL, MongoDB, SQLite, ZFS
Cloud & DevOps	Microsoft Azure, Docker, GitHub Actions (CI/CD), Proxmox VE, Prometheus, Grafana
Concepts	Distributed Systems, Machine Learning Fundamentals, Clean Architecture, OOP, Zero-Trust Security

Projects

DS-Pay – Distributed Payments System — Python, FastAPI, ZooKeeper, SQLite

github.com/J4N3i

- Designed a distributed payments prototype applying **consensus algorithms** (Apache ZooKeeper leader election), WAL replication, and idempotent transactions – concepts foundational to fault-tolerant AI infrastructure.
- Implemented **Lamport logical clocks** for causal event ordering and **Berkeley-style clock synchronisation** across a multi-node FastAPI cluster, demonstrating rigorous reasoning about distributed state.

TestLang Compiler (PPcom) — Java, JFlex, CUP, Spring Boot

github.com/J4N3i

- Built a custom-language compiler in Java using JFlex and CUP to generate an **Abstract Syntax Tree (AST)**, demonstrating deep understanding of formal language theory and tree-based data structures widely used in ML model representations.
- Exposed compiler functionality via a Spring Boot REST API, enabling automated script evaluation – analogous to model-serving inference endpoints.

Exodus – 3D Interactive Environment with AI Navigation — Unity, C#, NavMesh AI

github.com/J4N3i

- Programmed **autonomous AI agent behaviours** using Unity's baked NavMesh pathfinding system, implementing goal-directed navigation and dynamic obstacle response.
- Designed interactive object state machines and agent perception logic, providing hands-on experience with classical **AI planning and behaviour systems**.

Enterprise DevOps Lab & Private Cloud — Proxmox, TrueNAS, Docker, Tailscale, Prometheus

github.com/J4N3i

- Architected a zero-trust private cloud using Proxmox VE and TrueNAS SCALE; deployed a containerised microservices stack (Docker/LXC) including CI/CD pipelines via GitHub Actions to Azure.
- Configured **Prometheus and Grafana** for system observability – skills directly applicable to monitoring ML model performance and data pipelines in production.
- Implemented full network isolation via Tailscale (WireGuard) VPN mesh, maintaining secure remote access – relevant to safe deployment of AI services.

Internova – Internship Matching Portal — .NET 8, React, Azure, MySQL

github.com/J4N3i

- Engineered a full-stack 3-tier web application on Microsoft Azure, implementing JWT authentication, RBAC, and a 3NF normalised relational database – demonstrating production-quality backend skills applicable to AI-powered platform development.

- Built and deployed a modern animated portfolio at janeeshagamage.me using React 18, TypeScript, GSAP ScrollTrigger, TanStack Query, and shadcn-ui.

Positions of Responsibility

Vice President

2025 – Present

Computer Science Student Community, SLIIT

Sri Lanka

- Provide strategic oversight for academic, professional, and student-led initiatives; liaise with faculty to support departmental objectives.

Value Delivery Team Leader

2024 – Present

AIESEC in SLIIT

Sri Lanka

- Lead a cross-functional team to deliver organisational programmes, ensuring timely execution and stakeholder alignment.

Committee Member

2024 – Present

Faculty of Computing Student Community (FCSC) & Microsoft Club of SLIIT

Sri Lanka

- Contribute to faculty-level student initiatives; engage in technology workshops, seminars, and Microsoft-focused community activities.

Prefect

2017 – 2020

President's College, Embilipitiya

Sri Lanka

Other Experience

Trainee

2022 – 2023

Bank of Ceylon (BOC)

Sri Lanka

- Supported daily banking operations and customer service; developed professional competencies in confidentiality, data handling, and organisational discipline.

Soft Skills

- Analytical Thinking and Problem Solving
- Research Mindset and Self-Directed Learning
- Leadership and Cross-functional Collaboration
- Professional Communication (Written & Verbal)
- Time Management and Reliability

Awards and Achievements

- Special Merit Place – Innovation Competition, National Convention on School Students' Quality Circles (2018)
- Best Eight – Kumite, Sakura Open Karate Championship (2017)
- Placements at International and All-Island Karate Championships (2012–2016)

Referees

Mr. Jeewaka Perera

Senior Lecturer, Faculty of Computing (Computer Science)
Sri Lanka Institute of Information Technology (SLIIT)
